

## CHIPBOARD PARTITIONS

Fully assembled partitions are custom made in cell configurations to fit any shipping container, to protect products such as glass and plastic bottles, electronics, pharmaceuticals, glassware and more.

Chipboard partitions have many advantages over corrugated partitions and can be produced in cell sizes ranging from 1" to 12" and in heights from 2" to 14".

Seaside Paper Products started as a Chipboard Partition manufacturer. Over the years, we have developed and produced many other products, but we remain an industry leader in quality and on-time delivery of Chipboard Partitions.
