

Chipboard Partitions

Protect your valuable products with Seaside's Chipboard Partitions!

Seaside Paper Products began as a Chipboard Partition manufacturer more than 40 years ago! Over the years, we have developed and produced many other products for many industries, but remain a leader in quality and on-time delivery of Canadian made Chipboard Partitions.

Fully assembled partitions are custom made in cell configurations to fit any shipping container, to protect products such as glass and plastic bottles, electronics, pharmaceuticals, glassware and more.

Chipboard Partitions have many advantages over corrugated partitions and can be produced in cell sizes ranging from 1" to 12" and in heights from 2" to 14".
